RE: LR#: 4602.01; SJR 35 - Lager

Intent of the Bill:

Would limit general revenue appropriations and mandate state income tax rate reductions in certain situations.

Fiscal Impact of the Bill:

MCHCP assumes that if restrictions could be imposed that would limit the state from being able to properly transfer appropriations to MCHCP or any other state agency that MCHCP could, depending on the severity and the length of the restriction, be required to modify benefit design or cease payment of claims until funds become available for transfer.
